Objective

Aspiring Data Scientist with strong foundations in machine learning, data analysis, and NLP. Seeking an internship to apply analytical and problem-solving skills.

Skills

- 1 Programming: Python, SQL
- 2 Libraries/Tools: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn
- 3 Technologies: Machine Learning, Deep Learning, NLP, Data Analysis
- 4 Tools: Power BI, Git, Jupyter Notebook
- 5 Concepts: Data Cleaning, Feature Engineering, EDA, Model Evaluation

Projects

- 1 Resume Matcher System: Built NLP-based system using Sentence-BERT; matched resumes with job descriptions.
- 2 Customer Churn Prediction: Developed model using Random Forest and used SHAP for explainability.
- 3 Movie Recommendation System: Built hybrid recommender system and deployed using Flask.

Education

B.Tech in Computer Science Engineering, XYZ College (2022 – 2026)

Certifications

- 1 Machine Learning by Coursera
- 2 Data Analysis with Python
